Test meth 1MHz~1GHz by RF impedance/material analyzer HP4291B (IPC 2.5.5.9); 2GHz, 5GHz, 10GHz by Resonator Cavity (IPC 2.5.5.13)

The above data is provided to designers and PCB shops for their reference. We truly believe the information is accurate, however, internal testing is recommended.

The effective sale is in accordance with the specification and ITEQ maintains the authority of revision to keep the best suitability for users.
